Summary

Computer Engineering graduate with knowledge of Python, data analysis, and basic machine learning concepts. Familiar with data cleaning, exploratory data analysis, feature engineering, and data preprocessing. Developed Python-based applications and an academic project on Credit Card Transaction Authentication System using Machine Learning and Face Recognition. Interested in starting a career in Python, Data Science and AI/ML.

Skills

- **Programming Languages:** Python, C++
 - **Data Analysis:** Pandas, Numpy, Matplotlib
 - **Machine Learning:** Data Cleaning, EDA, Feature Engineering, Scikit-Learn, Data Preprocessing, Basic ML
 - **Web Technologies:** HTML, CSS
 - **Tools:** Jupyter Notebook, VS Code, GitHub, Git
 - **Soft:** Teamwork, Communication, Problem Solving, Quick Learner
-

Education

DR. D.Y. Patil College of Engineering and Innovation, Pune University
B.E. Computer Engineering

CGPA: 6.44

Training

- **Python training — Elite Softwares, Pune, India** Dec. 2023 – Feb. 2024
 - Learned Python programming fundamentals and basic Django framework concepts.
 - Developed basic Python applications including Calculator, Contacts Book, and To-Do List as part of the training.
-

Projects

- **Credit Card Fraud Detection System using Machine Learning and Face Verification**
[\[https://github.com/ShantanuAptikar/Credit-Card-Fraud-Detection-Project\]](https://github.com/ShantanuAptikar/Credit-Card-Fraud-Detection-Project)
 - **Gate 1: Biometric Authentication (CNN):** Face Verification using InceptionResnetV1 (FaceNet) to match the person making the transaction against the registered cardholder's face embeddings.
 - **Gate 2: Random Forest ML Classifier:** Analyzes transaction properties to estimate the transaction's fraud risk.
 - **Project 2 [GitHub Link]**
 - What is happening in the project in one sentence.
-

Certificates

- **Python Training – Elite Softwares, Pune, India**
- **Basic Python Certificate – HackerRank**
