SUMMARY

Computer Engineering graduate with hands-on experience in Python, data analysis, and machine learning. Familiar with data cleaning, exploratory data analysis, feature engineering, data preprocessing, and building ML models using Scikit-learn. Developed projects involving regression, classification, and clustering, along with a credit card transaction authentication system using machine learning and face verification. Seeking an entry-level opportunity in Python, AI/ML, or Data Analytics.

SKILLS

- **Programming Languages:** Python, C++
- **Data Analysis:** Pandas, NumPy, Matplotlib
- **Machine Learning:** Scikit-learn, Feature Engineering, Data Preprocessing, Linear Regression, Logistic Regression, KNN, K-Means, Decision Trees, SVM
- **Web Technologies:** HTML, CSS
- **Tools:** Jupyter Notebook, VS Code, GitHub, Git
- **Soft Skills:** Teamwork, Communication, Problem Solving, Quick Learner

EDUCATION

DR. D.Y. Patil College of Engineering and Innovation, Pune
B.E. Computer Engineering | Savitribai Phule Pune University
CGPA: 6.44

TRAINING

- **Python training — Elite Softwares, Pune** Dec. 2023 – Feb. 2024
 - Learned Python programming fundamentals through practical exercises.
 - Developed basic Python applications including Calculator, Contacts Book and To-Do List as part of the training.

PROJECTS

- **Credit Card Transaction Authentication System using Machine Learning and Face Recognition** [\[https://github.com/ShantanuAptikar/Credit-Card-Fraud-Detection-Project\]](https://github.com/ShantanuAptikar/Credit-Card-Fraud-Detection-Project)
 - Developed a two-stage transaction authentication system combining face verification with ML based fraud risk detection.
 - Implemented face verification using InceptionResnetV1 and used Random Forest to assess transaction fraud risk.
- **Titanic Survival Prediction** [\[https://github.com/ShantanuAptikar/Titanic-Project\]](https://github.com/ShantanuAptikar/Titanic-Project) | [\[https://titanic-survival-ml-project.streamlit.app/\]](https://titanic-survival-ml-project.streamlit.app/)
 - Performed data preprocessing, categorical encoding, and EDA on the Titanic dataset.
 - Built Logistic Regression, KNN, and SVM models to predict passenger survival.
- **Used Car Price Prediction**
 - Performed data preprocessing, EDA, and feature engineering on used-car data.
 - Built a Linear Regression model and Streamlit interface for used-car price prediction.
- **Customer Segmentation using K-Means Clustering**
 - Performed data preprocessing and exploratory analysis on customer data.
 - Applied K-Means clustering to group customers into different segments.

CERTIFICATES

- **Python Training – Elite Softwares**
- **Basic Python Certificate – HackerRank**
